

Measurement Engineering for Restaurants, Catering and Supermarkets

Testo measuring instruments – The important ingredient for good food

Of course your customers expect from you food products which are fresh and food which is prepared with care and is wholesome. To achieve this, ambient conditions on display surfaces, in refrigerated cabinets and storage rooms must be monitored along with the temperatures of cooking units or the condition of the oil in a deep-fat fryer.

Testo is here to help you with all your measurement tasks. We make a point of following closely all the latest developments in the monitoring of foodstuffs. In this way, we are always in a position to offer up-to-date solutions optimised to suit your applications. It's no wonder that tens of thousands of Testo instruments are used regularly by supermarkets, food specialist stores, restaurants and catering services.

Measurement solutions for field use

The freshness of food products and the digestibility of food is difficult to judge. Measurements can help you make decisions. The procedures are usually time-consuming and often can only be carried out in the laboratory. Testo offers user-friendly measurement engineering solutions suitable for daily use. One good example are the new pH probes which work with a gel electrolyte as a reference medium for pH measurement and, unlike conventional sensors, are leak-proof, maintenance-free and

not affected by dust and dirt particles. A real highlight is the electronic cooking oil tester which provides you with reliable information within seconds about the state of the oil in a hot deep-fat fryer. The advantage for you is that you can determine the flavour of your deep-fried food and also use cooking oil sparingly. Analysis of the state of the oil based on polarisable substances is recognised internationally but has been mainly carried out in laboratories up to now or was determined via test sets for which replacements had to be purchased.

Fully reliable and efficient

Measuring instruments must be accurate at all times. We offer you well-engineered instruments which have not only been subjected to stringent tests during the development phase but have undergone comprehensive year long field tests prior to being released on the market. The instruments also have to be calibrated to ensure food safety. Calibration should be carried out annually to augment legal certainty. Our calibration laboratories are held in high esteem internationally and are also approved for calibrations on behalf of the Deutschen Kalibrierdienstes (DKD=German Calibration Service).

Documenting parameters systematically

You have to document your measurements so that they are verifiable. Many of Testo's instruments can be read out with a practical fast printer via infrared. Measurement data is documented practically automatically. The data in our dataloggers, with which you can record temperatures and air humidity in storerooms, freezers or display surfaces, for example, can also be collected by a „data collector“ and then sent to a PC. A convenient method to collect data from different sites.

Better measurements with better equipment

Often, it is the right accessory which makes a measurement engineering solution complete. Testo offers a wide range of accessories for its instruments which, in turn, helps you to complete your measurement tasks efficiently. The range extends from numerous different probe types and designs, optional wireless or conventional probes via a fast printer and data collector to a dishwasher-safe TopSafe protection case with which you can protect your instrument from dirt, impact and moisture.

Learning changes

What was that again – who has to measure with calibrated measuring instruments? What exactly is the connection between germ multiplication and temperature?

If you need answers to the above questions, just give us a call. We will do our best to answer them.

Top engineering for first class products

Horst Zahner,
Managing Director
and Company
founder,
Traiteur GmbH,
Freiburg, Germany

Zahner Traiteur GmbH in Freiburg, Germany was founded in the year 1970 and over the years has developed into a modern production business in the food sector. The high levels of product warranty, reliability and quality have been consistently improved on over the past 30 years of the company's existence. The company is one of the most renowned in the delicatessen and catering segment. More than 90 employees work to supply top products on a daily basis. 36 small haulage contractors are responsible for delivering prepared goods every day.

We spoke to Managing Director and Company founder Horst Zahner:

„You cannot compromise on quality – we cannot just sign and that's it – we live it every day with our whole team; regardless of whether it is catering, delicatessen dishes, party service or our fresh pasta.

Closed quality assurance systems, which can be documented, are an indispensable requisite for our continued market success. We recognised at an early stage that Testo speaks our language exactly. No other supplier offers the range of products and this level of efficiency. As you can imagine, in our business not only is highest quality important, punctuality and speed are also top priorities and Testo's product line accommodates us with user-friendly operation, manageability and robustness. Now, that's what I call field-oriented measurement engineering.

By the way, the ever resourceful Testo developers really hit the mark with their logger systems. Now we can monitor transport of our highly sensitive products non-stop; nothing is left to chance and documentation of the measurement data just couldn't be easier.

Over the last few years, we have started sending our employees regularly to Testo for training. Not only do we gain important insights into the optimum use of Testo measurement engineering, but we also learn how we can quickly adapt to the latest legal requirements.

That's what I call all-inclusive – Keep up the good work Testo – after all, we quality fanatics have to stick together...“

Calibratable Temperature Measuring Instrument

testo 112

testo 112 combines two temperature measuring instruments in one. In addition to the complete NTC probe range, Pt100 probes can also be attached. In this way, the temperature range of -50 to +300 °C is covered to the highest accuracy level. testo 112 is therefore the ideal instrument for food measurements ranging from the deep-freeze sector to the oil temperature in deep-fat fryers.

The backlit display makes it easy to read in environments with poor lighting. Minimum and maximum values can be called up at the touch of a button. It is possible to print readings on site, for documentation purposes, on a fast printer (accessory).

- Large, backlit display with 14 mm high characters
- Call up max/min values at the touch of a button

Wireless measurement using radio probes

Displays max./min. values in a two-line, backlit display

TopSafe. protects measuring instrument from impact, dirt and water, dishwasher-safe (optional)

On-site readings printout on Testo fast printer (optional)

testo 926

The fast-action, efficient temperature measuring instrument, testo 926, for the food sector. The optional TopSafe protection case renders it insensitive to dirt, therefore making it the ideal partner for large-scale kitchens, hotels, restaurants or the food industry. Besides measuring minimum and maximum values, readings can also be printed on site on the Testo fast printer. In addition to the wide range of standard probes with cable, a wireless radio probe can be used simultaneously, if required.

- Measurement parameters °C, °F, °R
- Fast-action probes for every application
- Wireless measurement with radio probes possible (optional)
- Audible alarm (adjustable alarm limits)
- Measurement data printout on site on the Testo fast printer
- TopSafe, the indestructible protection case (optional)

Spot check thermometer - Fast and efficient

testo 925

Fast-action spot check thermometer with special probes for hotels, industrial kitchens, catering industry, supermarkets etc.

- Stable surface probe for checking cooking plate, heating and baking tin temperatures e.g. in fast food restaurants.

- Robust immersion/penetration probe to monitor cooking processes or cooking oil temperature.

- Super-fast needle probe for temperature checks on thin goods such as hamburgers.

- Air probe for a fast temperature check e.g. in freezers.

An additional temperature probe can be displayed in the testo 925

measuring instrument; data transmission is by radio, i.e. wireless.

- Special probes for industrial kitchen sector
- 1 channel measuring instrument with optional radio probe
- Continuous display of max/min values
- Display light
- An audible alarm sounds when limit values are exceeded

testo 925, 1 channel temperature measuring instrument T/C Type K, audible alarm, connection of an optional radio probe, with battery and calibration protocol

Part no. 0560 9250

Printer and Accessories Part no.

Testo fast printer with wireless infrared interface, 1 roll thermal paper and 4 AA batteries	0554 0549
Spare thermal paper for printer (6 rolls), measurement data documentation legible for up to 10 years	0554 0568
Spare thermal paper for printer (6 rolls)	0554 0569
Lithium battery, button cell, type CR 2032 for wireless probes	0515 0028

Transport and Protection Part no.

TopSafe, protects from impact and dirt	0516 0221
Case for measuring instrument and probes	0516 0210
Transport case for meas. instr. and probes (405 x 170 x 85 mm)	0516 0201
Transport case for measuring instrument, 3 probes and accessories (430 x 310 x 85 mm)	0516 0200

Calibration Certificates Part no.

ISO calibration certificate/temperature, for air/immersion probes, calibration points -18°C; 0°C; +60°C	0520 0001
ISO calibration certificate/temperature, meas. instr. with surface probe; calibration points +60°C; +120°C; +180°C	0520 0071

Measurement data printout on site on Testo fast printer (optional)

Practical checks on cooking plate temperature, for example

TopSafe, indestructible case, protects from dirt and impact (option)

Practical monitoring during cheese storage, wireless, measurement data transmission via radio

Technical data

Probe type	Type K (NiCr-Ni) or NTC if radio immersion/penetration probes are used
Meas. range	-50 to +1000 °C
Accuracy	±(0.5 °C +0.3% of mv) (-40 to +900 °C) ±1 digit
Resolution	0.1 °C (-50 to +199.9 °C) 1 °C (remaining range)
Oper. temp.	-20 to +50 °C
Storage temp.	-40 to +70 °C
Battery type	9V block battery, 6F22
Battery life	200 h (connected probe, backlight off) 45 h (radio mode, backlight off) 68 h (connected probe, backlight always on) 33 h (radio mode, backlight always on)

Highly accurate alarm and logger thermometer – With site management

Monitoring food

Risk factor: Bacteria

Consumers may be exposed to health risks caused by bacteriological contamination of food. This risk becomes dangerous when a specified quantity of germs is exceeded. Bacterial growth relies on temperature!

Measurements on non-frozen food

For fast and accurate measurements, the penetration probe must be inserted at least 5 times, better 10 times as deep as it is thick.

Measurements on frozen food

Use probes suitable for large pieces (e.g. screw-in frozen food probe) and insert sufficiently (min. 4 cm). In the case of flat products (e.g. pizza, fish), use probes with a thin or reinforced measurement tip.

Measurements in freezers and cold storage rooms

The air temperature in freezers and cold storage rooms should be a constant $-18\text{ }^{\circ}\text{C}$. If monitoring over longer time periods, data loggers with alarm, if limit values are exceeded, are recommended. Fast-response probes for measuring penetration temperature are recommended when dispensing food. A minimum temperature of $+65\text{ }^{\circ}\text{C}$ to $+70\text{ }^{\circ}\text{C}$ is recommended.

Non-contact temperature measurement (screening test)

At greater distances, the ideal distance between measuring instrument and the object being measured is dependent on the optics of the infrared measuring instrument. Always measure the temperature of the packaging on packaged food; in the case of plastic seal packaging, only measure at points where the packaging comes into direct contact with the product. Major measurement errors occur if ice crystals or shiny, reflective surfaces are measured.

Wireless measurement using radio probes

Analyses and documents readings according to product names using PC software (included)

Displays site and parameter. Up to 99 product names can be stored in the instrument

On-site readings printout on Testo fast printer

testo 735-2

The robust and compact measuring instrument with a probe socket for highly accurate Pt100 probes and two sockets for fast-action thermocouple probes. Readings from up to three additional temperature probes can be displayed in the testo 735-2 measuring instrument's clear display; data transmission is by radio, i.e. wireless. The measurement values can be simultaneously transferred to a PC and stored there. In this way, a total of 6 channels is recorded by the measuring instrument. A system accuracy of 0.05 °C with a resolution of 0.001 °C is reached using the plug-in highly accurate Pt100 immersion/penetration probe. The measuring instrument is therefore ideally suited for use as a working standard.

Temperature characteristics are recorded in the instrument and then analysed in graphics and tables on your PC/Notebook. Data is printed on site on the Testo fast printer using infrared.

Selectable user profiles, i.e. allocation of specific function buttons to an application facilitate intuitive and fast operation. Individual protocols or measurement series can be stored according to site. Up to 99 sites can be stored in the instrument. The storage cycle is user-defined between 0.5 seconds and 24 hours.

- System accuracy up to 0.05 °C
- Instrument memory for up to 10,000 readings
- PC software for filing, analysing and documenting measurement data (included)
- Displays, saves and prints Delta T, min, max and mean values
- Audible alarm if limit values are exceeded
- Protection class IP65

PC software for filing and documenting measurement data (included)

Spot checks for frozen goods in refrigerated rooms

Fast documentation thanks to on-site data printout

Checks temperature when dispensing food; no annoying cables thanks to radio probes

Reference measuring instrument – With highest precision

testo 950

Assuring quality means adhering to temperatures. The testo 950 precision measuring instrument can be used for frozen food temperatures to high oven temperatures. The measuring instrument combines user-friendly menu-driven operation and has a system accuracy of up to 0.05°C.

A readings memory for max. 500,000 readings is available for long-term measurement. All important parameters such as start and end of measurement, measurement intervals, limits exceeded/fallen short of and date/time can be programmed.

The saved measurement data can be analysed using PC software or printed on the Testo fast printer on site.

- System accuracy up to 0.05 °C and up to a resolution of 0.001 °C with precision probe 0614 0240

- System adjustment integrated in measuring instrument – fast thermocouple probes can be adjusted to a reference value using the 0614 0240 precision probe.

Mini infrared thermometer – Pocket-size

testo 805

The infrared thermometer, which is only 80 mm in size, fits inside any pocket and is always ready at hand for fast measurements in Incoming Goods, for example. Also ideal for quick measurements when distributing food.

- High accuracy in a critical area for food
- Packaging remains undamaged
- TopSafe is dishwasher-proof
- Display of minimum and maximum values
- Scan mode for permanent measurement

Distance thermometer for infrared monitoring measurements

testo 831

Thanks to its 30:1 optics, the measurement spot diameter is only 3.6 cm at a distance of 1 m. This means that even small objects such as yoghurt pots can be easily measured at a distance. Measurement errors are avoided due to a 2-point laser which indicates the exact measurement spot. At two measurements per second, the testo 831 is so fast that measurements on palettes or refrigerated shelves can be carried out in seconds.

- Infrared thermometer with 30:1 optics
- Broad measurement range of -30 to +210 °C
- Backlit display
- Alarm limit values can be set and are optically and audibly indicated
- Including belt holder and factory calibration certificate
- Also available as a set with the core thermometer testo 106

testo 845 – the infrared measurement technology for temperature with integrated humidity module

The testo 845 is a milestone in non-contact temperature measurement. For the first time, surface temperatures with smallest diameters can be measured accurately at short and long distances. The switchable optics for far-field and close focus measurement make this possible.

testo 845 is equipped with an optical resolution of 75:1 for far-field measurements. Surface temperatures can be measured accurately even at great distances from the object to be measured. At a distance of 1.2 metres from the object to be measured, the measuring spot diameter is only 16 mm. A cross laser marks the measuring spot exactly during measurement. Incorrect measurements are eliminated - you always know exactly where you are measuring.

The close focus optics allow the measurement of temperatures on the smallest surfaces with a diameter of just 1 mm and a distance of 70 mm! Two lasers mark the measuring spot exactly.

- Switchable optics for far-field measurements (75:1) and close focus (1 mm, 70 mm distance)
- Especially bright cross laser sighting for indicating the actual measuring point
- Reference accuracy ± 0.75 °C with super-fast measurement technology (scanning 100 ms)
- Backlit display (3-line), shows °C, min./max. values, alarm limit values and emissivity; in addition display with humidity module: %RH, °Ctd
- Optical and audible alarm when limit values are exceeded
- Instrument memory for 90 measurement protocols
- PC software for archiving and documenting measurement data (included in delivery)
- Tripod fitting for online measurement via USB cable (included in delivery)

testo Saveris™ – Measurement data monitoring in the food industry

In restaurants, food retail and in large kitchens, the cold chain must be guaranteed at all times. In order to keep foodstuffs fresh and to adhere to hygiene requirements, the uninterrupted documentation of the cold chain is necessary. testo Saveris provides optimum support here.

testo Saveris automates the monitoring of the cooling chain and thus provides you with security and time savings.

Should a limit value be exceeded, testo Saveris immediately issues an alarm. Various alarm options can be set based on your wishes. You thus receive not only uninterrupted documentation, but also will be informed immediately if the temperatures are outside the prescribed range.

The testo Saveris wireless probes stand out thanks to their easy, fully automatic commissioning and absolutely safe transfer of measurement data.

The testo Saveris base saves all measurement values in its long-term memory, and sends optical and audible alarm reports, e.g. by SMS.

Now new!

The testo analog coupler enables the integration of all transmitters with standardized current/voltage interfaces, e. g. 4 to 20 mA

The network-capable testo Saveris software offers a central overview of the measurement data, and uninterrupted documentation.

Conforms to important standards in the food industry (HACCP and EN 12830)

Note on the radio frequencies

868 MHz: EU countries and certain other countries (e.g. CH, NOR)

2.4 GHz: non-EU countries (country list can be called up under www.testo.com/saveris)

testo Saveris™ System overview

testo Saveris radio probe

Probe versions with internal and external temperature and humidity sensors allow the adaptation to every application. The radio probes are available with or without a display as an option. The memory in the probe ensures that the measurement data is not lost in the event of an interference in the radio link. Current measurement data, the battery status and the quality of the radio link are shown in the display.

testo Saveris router

The radio link can be improved or lengthened with poor structural conditions by using a router. Naturally several routers are possible in the testo Saveris system, but several routers are not connected in series.

Through the connection of a converter to an Ethernet jack, the signal of a radio probe can be converted into an Ethernet signal. This combines the flexible connection of the radio probe with the use of the existing Ethernet even over long transmission paths.

testo Saveris analog coupler

The analog coupler allows the inclusion of further measurement parameters into the testo Saveris monitoring system, by integrating all transmitters with standardized current/voltage interfaces, e. g. 4 to 20 mA or 0 to 10 V.

testo Saveris™ System overview

testo Saveris base

The base is the heart of testo Saveris and can save 40,000 readings per measurement channel independent of the PC. This corresponds to around one year of memory capacity at a measuring rate of 15 minutes. The system data and alarms are visible via the display of the Saveris base.

testo Saveris software

The testo Saveris software offers simple operation and an intuitive user interface. The Saveris software is available in two different versions: as the basic version SBE (Small Business Edition) or the PROF (Professional) software version with diverse additional options, or as a CFR version. The CFR software fulfils the requirements of 21 CFR Part 11 of the FDA, and is thus validatable.

testo Saveris™ Examples of applications

Temperature monitoring in specialist retailers and large-scale kitchens

The measurement data is saved centrally and can thus be called up at any time. It goes without saying that the testo Saveris conforms to the food standard EN 12830. Using this uninterrupted documentation that testo Saveris offers, you always play it safe when it comes to monitoring of your temperatures.

Easiest operation of testo Saveris

Sabine Steinbrunner, proprietor of food product market 'Culinara'

"I was very pleasantly surprised at how easy the installation and operation were."

Documentation and issuing alarms in bakeries and butcher shops

The uninterrupted monitoring of the cooling chain is required for food specialist retailers.

Fresh goods are required by the customer but are at the same time required by the legislation in the hygiene area.

testo Saveris automates the monitoring of the ambient and product temperatures in store rooms, cold rooms, freezer areas and cooled sales counters. Naturally an alarm is issued immediately whenever a limit value is exceeded, on site as well as remotely.

Automatic monitoring of the cooling chain saves time

Werner Schmidt, proprietor of butcher's shop 'Metzgerei Haller'

"With testo Saveris the temperature monitoring of the food practically runs itself. Now I have more time for the customers!"

Data loggers — Logging, saving, printing and analysing

What is the temperature really?

Portable and
Systems

How can you be sure that your analyser measures exactly what it should be measuring? Our certified DKD laboratories are unbeatable in their accuracy and give the

values for all Testo measuring instruments - That's what true measurement efficiency is all about.

The competence of our engineers is held in high esteem by expert groups and committees in Berlin and Brussels where they are involved in the developments of future guidelines in their capacity as representatives of industry.

A comprehensive exchange of knowledge and experience with official measurement institutes around the world (e.g. DKD) ensures that your Testo measuring instrument can hold up to any comparison. Indeed, these efforts do have an objective: whoever uses Testo measurement engineering, can be assured that he is using the industrial standard.

Of further benefit to you: We know today about the guidelines and test specifications we will be faced with in the future.

Monitor storage temperature – Small and practical

testo 174

The testo 174 mini data logger is ideal for accompanying transports as it can unobtrusively monitor temperature fluctuations non-stop. The current reading is shown in the display.

The following can be called up: Stored minimum and maximum value, limit values and battery life.

- Accurate, punctual temperature logging with up to 3900 readings
- Alarm display if user-defined maximum/minimum values are exceeded
- Software to read out data, data analysis and parameter setting
- Secure data even if battery is spent

Monitor ambient storage conditions – Reliably and efficiently

testo 175-H1

The affordable humidity/temperature logger testo 175-H1 without display monitors fluctuations in storage humidity and temperature efficiently and unobtrusively.

Limit values can be entered, an alarm display is activated if the limits are exceeded. testo 575, the fast printer, supplies proof of fluctuations in ambient conditions.

- Humidity sensor guaranteed long-term stable
- Memory for up to 3700 readings (testo 175-H1)
- Memory for up to 16000 readings (testo 175-H2)
- Data safe even when battery is spent
- Fast documentation on infrared printer, 6 lines/s

- Large display (testo 175-H2)

testo 175-H2

The compact humidity/temperature logger with display. It provides you with a fast on-site overview of current readings, the last values saved, max and min values and the number of times limits were exceeded.

The testo 575 fast printer provides proof that the specified ambient storage conditions or production conditions have been adhered to. All of the values logged by the testo 580 data collector can then be uploaded to your PC for analysis.

testo 175-H1 without display. Data is printed on the fast printer.

Long-term temperature monitoring – Professional and non-stop

testo 177-T1

The professional testo 177-T1 data logger (without display) monitors specified storage and transport conditions in the refrigeration and deep-freeze sector efficiently and accurately over a period of months and years.

Temperature fluctuations which cause damage are documented on the testo 575 fast printer or analysed on your PC via interface.

- Logs temperatures with up to 48,000 readings
- Specially for use in low temperatures (up to $-40\text{ }^{\circ}\text{C}$)
- On-site: Fast documentation on the infrared printer, 6 lines/s
- Collect data on-site with testo 580 and download to your PC for analysis

testo 177-T2

testo 177-T2, the professional data logger with display. It provides you with a quick overview of the current reading, the last value saved, max and min values and the number of times the limits were exceeded.

All of the values collected by the testo 580 data collector during long-term monitoring over months/years can be sent to your notebook/PC. Convenient analysis possible using software based on Windows®.

Head of Customer Service

The truck data logger with 2 probe sockets and event logging

testo 177-T3

testo 177-T3 documents 3 temperatures and an event simultaneously providing proof of an uninterrupted cooling chain during transport.

For example, complete monitoring of ambient air, intake and outgoing temperature with simultaneous monitoring of the door or the compressor is possible when monitoring transport. The measuring rate of the event can be set completely independently of the measuring rate of the temperature channels.

- Temperature logging of up to 48000 readings
- Data is read out without interrupting the measurement series
- Data analysis as table or graph, with Email function

Long-term monitoring of ambient conditions – Professional and non-stop

testo 177-H1

Sensitive products require the right ambient conditions during production and storage. Efficient measurement and documentation of the readings over months/years is possible with the testo 177-H1 professional data logger.

Additional surface, immersion and air probes can be attached to the data logger e.g. for uninterrupted measurement of the dewpoint difference.

- Long-term stable humidity sensor with fast response time
- Memory for 48,000 readings
- Control and adjustment option with adjustment set
- Protection caps for dirt-ingressed or corrosive gases

Accessories for testo 175 and 177

testo 575 fast printer

- Fast-action print mechanism, 6 lines/s
- Prints tables/graphics
- Brief info. or full memory can be printed as required
- Determine section to be printed
- Your language can be set
- Self-adhesive Testo paper can also be used

Fast printout and logger rebooting with testo 575

Part no. 0554 1775

testo 580 data collector

- Can read out up to 25 full testo 175 loggers or 10 full testo 177 loggers
- Displays all data information
- Download collected data to PC using Testo ComSoft 3

The testo 580 data collects data on site for upload to PC and analysis

testo 580 with RS232 interface

Part no. 0554 1778

testo 580 with USB interface

Part no. 0554 1764

testo 581 alarm signal output

- Transmission of alarm messages – e.g. when programmed limit values in the data logger are exceeded – to external components such as horns, lamps, PLC etc.
- Signal transfer via floating signal output

Alarm signal output for reliable notification of limits exceeded

Part no. 0554 1769

Ethernet adapter

- Fast transfer of readings
- Use of an existing network without additional cabling
- Long transmission paths
- Identification of measuring instruments in system network
- In connection with ComSoft 3

Read out the data stored in the logger via the PC network using the Ethernet adapter

The "old reliable" — In full-metal housing

testostor 171-0

A temperature data logger in full-metal housing with integrated temperature probe. A long life is guaranteed even in tough conditions.

The data is read out to a PC via the attachable interface.

- Logs up to 55000 readings
- Tamperproof readings
- Theft-proof mounting
- Waterproof, robust metal housing, IP 68
- On site application: Testo Software for Palm OS® replaces laptop/PC

The "old reliable" – With external probes

testostor 171-1

You can place the testostor 171-1 data logger beside the goods, for example, and attach the external probe to doors or refrigeration appliances located up to 12m away. Air moisture can also be monitored, if required.

- Logs up to 55000 readings
- Probe can be positioned quickly and easily
- Tamperproof measurement results
- On site application: Testo Software for Palm OS® replaces laptop/PC

testostor 171-1, external probe socket can be positioned at up to 12m away

testostor 171-4

testostor 171-4 with up to 4 external temperature probe sockets is used for simultaneous temperature measurement at different locations.

Electronic thermohygrograph in full-metal housing

testostor 171-3

testostor 171-3, a compact data logger with built-in humidity/temperature probe.

The saved data can be documented on site on the Testo printer or can be analysed on your PC via interface and software.

- Suitable for outdoor use
- Control and adjustment option using adjustment set
- Logs up to 20000 readings
- Measuring rate: 2 s to 24 h, selectable
- Sintered cap protection for dusty environments (see Accessories)
- On site application: Testo Software for Palm OS® replaces laptop/PC

Monitors humidity and temperature in storage rooms

testostor 171-3

Internal %RH/°C

testostor 171-3, humidity data logger for %RH, °C with starting magnet, battery and calibration protocol; calibration certificates (ISO/DKD) must be ordered separately

Part no. 0577 1713

Set 1: Without display

Set testostor 171-3, incl. humidity data logger for %RH, °C with starting magnet, battery, calibration protocol and software with interface; calibration certificates (ISO/DKD) must be ordered separately

Measuring cooking oil quality – quickly and accurately

testo 270

The cooking oil has been frequently used. Longer use is bad for the quality of the product and can lead to complaints from the customer.

The most important part of the testo 270 cooking oil tester is Testo's new capacitive oil sensor. Using this sensor, measurements are carried out directly in the hot cooking oil which means that control measurements can be quickly carried out while work in the kitchen is in progress. Several deep-fat fryers can be tested back-to-back without the sensor having to cool down.

Maximum use of the cooking oil is made possible. The oil is only changed if the limit value is reached.

- Measurement directly in the deep-fryer
- Sensor is embedded in metal and breakage-proof, can be easily wiped clean thanks to sensor protection layer
- Fast measurement value display in % TPM
- Automatic recognition of measurement end (Auto-Hold %TPM)
- With 2 freely selectable limit values
- Alarm function audible and visual:
 - Lettering "ALARM"
 - 3-colour LED bar (green, yellow, red)
- Configuration menu and limit values can be locked to protect them from external manipulation
- Removable protective case and optional hand strap (dishwasher-proof)
- Conforms to: VO (EG) 1935/2004, EC guideline 2004/108/EC

2-line display with alarm for limit value violations

Breakage-proof, maintenance-free and easy-to-clean sensor with sensor protection layer

Compact pH tester – For liquids

testo 206 pH1

The pH measuring instrument for fast checks on liquids. The combination of pH immersion tip and temperature probe for fast and efficient temperature compensation is unique.

The Testo pH probe is leak-proof, maintenance-free, robust and not affected by dirt thanks to the large volume of gel electrolyte and the dual wall diaphragm.

- Maintenance-free gel electrolyte
- Built-in temperature probe
- 1, 2 or 3 point calibration possible

- Empty dosing chamber following adjustment, i.e. no contamination caused by left over buffer solution

One-hand pH/°C measuring instrument – Robust and maintenance-free

testo 205

A robust food penetration pH/°C measuring instrument with automatic temperature compensation. The robust penetration measuring tip is interchangeable and not affected by dirt and dust thanks to the hole diaphragm.

- Combined penetration tip with temperature probe
- Measuring tip can be changed by user
- Maintenance-free gel electrolyte
- Backlit display
- Audible key feedback
- 2 line display
- Automatic full-scale value recognition
- 1, 2 or 3 point calibration possible

Compact conductivity/°C measuring instrument – With range of probes

testo 240

testo 240 is a complete conductivity measuring instrument and a high standard thermometer combined in one compact, waterproof housing.

Measurement errors caused by high conductivities and deposits on the electrodes are avoided thanks to the 4 electrode engineering used. The salt level (NaCl) in an aqueous solution can be measured directly.

- Long life of measurement cell thanks to 4 electrode engineering
- Extremely wide measurement ranges with only one measurement cell

testo 110	Temperature monitoring – Highly accurate 12
testo 112	Calibratable temperature measuring instrument – Highly accurate 14
testo 926	Fast, accurate all-round thermometer 16
testo 925	Spot check thermometer – Fast and reliable 20
testo 735-2	Highly accurate alarm and logger thermometer 22
testo 950	Reference measuring instrument 26
testo 805	Mini infrared thermometer 27
testo 826-T1/-T2	Temperature measurement – Non-contact 28
testo 826-T3/-T4	Temperature measurement – Non-contact or direct 28
testo 831	Distance thermometer for infrared monitoring measurements 29
testo 845	The infrared measurement technology 30
Monitoring-System	
testo Saveris™	Central measurement data monitoring 32
<i>Data loggers</i>	
testo 174	Monitors storage temperature 43
testo 175-T1	Documents storage temperature 43
testo 175-T2	Logs temperature 44
testo 177-T1/-T2	Long-term temperature monitoring 46
testo 177-T3	The data logger for trucks 47
testostor 171-0	The „old-reliables“ – in full-metal housing 50
testostor 171-1/-4	The „old-reliables“ – with external probes 51
testostor 171-3	Electronic thermohygrograph in full-metal housing 52
Humidity	
testo 608-H1/-H2	Monitors ambient storage conditions 27
<i>Data loggers</i>	
testo 175-H1/-H2	Monitors ambient storage conditions 45
testo 177-H1	Long-term monitoring of ambient conditions 48
Analysis	
testo 206-pH1	Compact pH tester – For liquids 54
testo 206-pH2	Compact pH tester – For semi-solid food 54
testo 205	One-hand pH/°C-measuring instrument 55
testo 230	Compact pH/°C measuring instrument – With selection of probes 56
testo 240	Compact conductivity-/°C-measuring instrument 57
Additional parameters	
testo 270	Measures cooking oil quality 53

Icons

Backlit display

User-friendly operation based on menu-driven operations

Radio probes for wireless applications

SoftCase or TopSafe to protect instrument or protect instrument from water ingress

Shock-proof

Infrared printer
Efficient paper documentation of measured results on site

RS 232/USB interface
For easy connection to analysis software

Battery and rechargeable battery operation possible

Battery can be recharged in instrument
